

PRANAV RAJIV

Chicago | 312-478-1133 | pranav.rajiv@kellogg.northwestern.edu

Product and analytics leader with 8 years of experience solving growth, pricing, customer-retention, and product-investment questions in digital health. Uses customer research, product data, and financial analysis to develop recommendations and lead execution, delivering 30% annual adoption and subscription-revenue growth, 10% lower churn, and multi-million-dollar NIH funding.

EDUCATION

2023-2027	NORTHWESTERN UNIVERSITY - KELLOGG SCHOOL OF MANAGEMENT <i>Master of Business Administration Candidate, Expected, June 2027</i> - Focus: Marketing and Operations - Leadership: Director of Operations, E&W Tech Club; coordinate event operations, speaker logistics, and member engagement for the Kellogg technology community.	Evanston, IL
2020-2022	NORTHWESTERN UNIVERSITY <i>Master of Science, Information Systems, AI Concentration, GPA: 4.0/4.0</i>	Evanston, IL
2016-2018	UNIVERSITY OF WISCONSIN MADISON <i>Bachelor of Science, Computer Science</i>	Madison, WI

EXPERIENCE

2018-Present	NORTHWESTERN UNIVERSITY <i>Product & Platform Lead (Official Title: Senior Software Developer), 2024-Present</i> - Led the launch of an iPad-based gaze-tracking platform for early autism diagnosis, from product design through national rollout; increased customer adoption and subscription revenue 30% year over year across NIH-funded programs. - Built the case to invest in a new gaze-tracking approach by combining clinical research, customer feedback, market need, and ROI analysis; helped secure multi-million-dollar NIH funding for national deployment. - Worked with clinical, product, and engineering teams to identify the main drivers of customer churn; prioritized workflow, reporting, and user-interface changes that reduced churn 10% and increased NPS by 2 points. - Analyzed subscriber growth, upgrades, usage, and retention to assess a multi-device subscription model; gave leadership weekly updates used in product and investment decisions. - Led the transition from Jenkins to GitHub Actions across product and engineering, cutting release-cycle time 40% and improving release reliability. - Built and integrated the iOS platform for NIH Toolbox V3, including Zoom SDK connectivity and participant and examiner applications used in clinical-research workflows. - Created training and documentation for interns, reducing ramp-up time from more than four weeks to one week. - Used Claude Code and GitHub Copilot in a human-reviewed development workflow to speed implementation, surface edge cases, and prepare code reviews and technical documentation, reducing release-preparation time by 32%. <i>Product Analyst Lead (Official Title: Software Developer), 2018-2024</i> - Built automated reporting and data pipelines across several digital-health applications, improving query performance 10x and giving leadership regular visibility into revenue, subscriber trends, and customer engagement. - Assessed pricing options using customer-survey results, user behavior, and financial models; recommended a pricing approach projected to increase revenue 25%. - Analyzed conversion funnels, customer cohorts, and product usage to identify growth opportunities and help set product priorities. - Built prototypes and automated testing tools for new NIH Toolbox applications, helping teams identify issues earlier and shorten QA cycles.	Chicago, IL
July 2017	IONIC FRAMEWORK <i>Software Developer Intern, July 2017-Sept 2017</i> - Built a Sphinx documentation extension that automatically generated documentation for nested classes in SQLAlchemy models. - Documented, presented, and demoed product improvements for the engineering team; gained experience working in an Agile software-development environment.	Madison, WI

SKILLS AND EXPERTISE

- Analytics & Strategy:** Financial modeling, product analytics, SQL, data visualization, market and customer analysis.
- Product & Delivery:** Product strategy, roadmap development, stakeholder management, user research, digital-product delivery.
- Technical:** iOS (Swift), Python, Continuous Integration/ Continuous Deployment, GitHub Actions, Jenkins, AWS
- Domain:** Digital health, healthcare research, subscription SaaS

COMMUNITY & INTERESTS

- Volunteer:** Pain & Palliative Medicine Department, supporting patient-facing, administrative initiatives; PAWS Chicago, supporting animal care, adoption events, fundraising and foster activities.
- Interests:** Pickleball, snowboarding, strength training, dinner clubs.
